

The staff in the Engineering Centre for Excellence in Teaching and Learning (engCETL) work with engineering-related academics, students and staff at Loughborough University. engCETL includes a wide range of skills, with a team of pedagogic researchers, industrial and academic co-ordinators and learning technologists. Included in this information pack are introductions to the engCETL staff, the engCETL learning and teaching space, some of the learning technology tools we have developed, and an introduction to pedagogic research.

We hope that you will find the leaflets interesting. Larger A4 sized leaflets are available, do get in touch to request them.

- What is engCETL?
- engCETL staff
- engCETL Call for Proposals Process
- The Keith Green Building and the Technology available for Teaching
- Guidelines for engCETL room bookings: An overview for staff
- Guidelines for engCETL room bookings: An overview for students
- Guidelines for engCETL equipment bookings: An overview for staff
- Guidelines for engCETL equipment bookings: An overview for students
- Involvement with Industry and the Placement Experience
- Guide to Pedagogic Research
- Engineering Educational Journals and Educational Journals
- An overview of TutorTools
- Introduction to Co-Tutor
- Introduction to Attendant
- Introduction to the Hands On website
- Emotional Intelligence amongst undergraduates at Loughborough University
